Dear all of the Infogroup and the Projectgroup,

1. This week I will address the question about the **help that anyone can now contribute** whom is not a researcher in our Projectgroup.

It is as simple as this:

We have made an alphabetical list on which are all the names of the people that died between 7 may 1945 and 21 may 1945 in Amsterdam, that we could **not yet** verify as victims of the Dam shooting drama. Remember that more than 120 people were wounded from which an unknown number died after the shooting took place. On the list below are the first names (voornamen) and surnames (achternamen) and the age they had. So when you know someone with the same surname as on the list, we would like you to ask that person if he knows about someone in the family that died in that period and ask around in his family about the circumstances (omstandigheden, achtergrond).
